CORE COMPETENCIES

Android Application Architecture & System Design

Scalable Mobile Application Development

Server-Driven UI & Modular Architecture

Mobile Performance Optimization & App Health

Engineering Leadership & Mentorship

Secure Mobile Application Development

Agile Delivery & Sprint Execution

Cross-Functional Product Collaboration

TECHNICAL SKILLS

Programming Languages

• Java | Kotlin | C++

Mobile & Cross-Platform

• Android Native Development | Jetpack Compose | Android SDK & Frameworks | Flutter | Kotlin Multiplatform (KMM) | React Native

Architecture & Patterns

• Clean Architecture | MVVM | MVP | MVI | MVC

Libraries & SDKs

• Jetpack Components | RxJava | Dagger2, Hilt | Firebase | Google Ads

Networking & Security

• Retrofit | Ktor | Volley | SSL Pinning | Code Obfuscation | Mobile OWASP Practices | GraphQL

Testing & Analytics

• AppsFlyer | Junit | Espresso | Mockito | Clevertap | Google Analytics

ANKIT GUPTA

Staff Software Engineer – Android

To contribute as a **senior Android engineer and architect**, building **scalable mobile systems** while mentoring teams and aligning engineering execution with business goals.

PROFILE SUMMARY

- Android engineering professional with **12 years of experience**, specializing in **Android application development, object-oriented programming (OOP), and Agile delivery**, across Consumer Internet, Fintech, Edtech, Retail, and Insurance domains.
- Currently working as a **Staff Software Engineer – Android at Grid Dynamics**, leading architecture and development of a business-critical insurance module for large-scale mobile platforms.
- Strong hands-on expertise in **Java, Kotlin, Clean Architecture, MVVM, and Compose-first UI** development for scalable and maintainable Android applications.
- Experienced in **system design, scalability, and performance optimization**, aligning mobile architecture with long-term business growth.
- Proven contributor in **Agile environments**, collaborating with **product managers, designers, QA, and backend teams** while mentoring engineers and supporting technical hiring initiatives.

WORK EXPERIENCE

Grid Dynamics – Hyderabad, Telangana
Staff Software Engineer – Android | Feb 2025 – Present

- Leading the design and ongoing development of the application’s **Insurance module**, acting as a senior individual contributor and architectural owner.
- Architecting scalable Android solutions using **Clean Architecture, MVVM, and system design principles**.
- Migrating UI layers to a Compose-first UI architecture, improving UI flexibility and long-term maintainability.
- Performing comprehensive code reviews and strengthening **UI and automation test suites**, improving overall application quality and stability.
- Collaborating closely with Product Managers to convert user stories into actionable engineering tasks, enabling smoother feature delivery.
- Driving **approximately 45% reduction in feature delivery time and maintenance effort** through implementation of **Server-Driven UI architecture** on Android.
- Mentoring **4 junior developers**, creating personalized growth roadmaps and providing continuous technical guidance.
- Supporting talent acquisition by conducting Android technical interviews and participating in candidate evaluations for senior roles.

Key Achievements:

- Improved release stability by 12-13%** through expanded automated test coverage and stricter code review practices.
- Reduced regression-related production issues by approximately 45%** after Server-Driven UI adoption.

Aqilea Technologies India Pvt. Ltd. – Bengaluru, Karnataka
Sr. Android Developer | Apr 2024 – Dec 2024

- Led architecture and development for **two high-impact Android modules**, improving module performance by **8%** and enhancing user experience.
- Conducted structured code reviews, resulting in a **20% reduction in bugs** and improved code quality across releases.
- Collaborated with cross-functional teams to reduce project delivery timelines by **22%**.
- Applied robust application and network security measures, firming data protection protocols.
- Migrated UI components from XML to **Jetpack Compose**, improving UI operability and development efficiency.

SOFT SKILLS

Technical Leadership & Mentoring

Architectural Decision-Making

Stakeholder Communication

Ownership & Execution Focus

EDUCATION

Diploma in Information Security

Appin Technology Lab, Noida | 2013

Bachelor of Engineering – Information Technology

Indore Institute of Science and Technology
(RGPV University) | 2009 –2013

CERTIFICATIONS

Certificate Program in Strategic Management and Business Essentials
INSEAD Executive Education | 2025

Scrum: The Basics
LinkedIn Learning | Issued Mar 2024

Scrum: The Basics
Project Management Institute (PMI) | 2024

Testing with JUnit - LinkedIn Learning | 2024

Kotlin Multiplatform Mobile Apps for iOS and Android
Udemy | 2023

Foundations of Project Management
Coursera | 2023

Information Security
United Latino Students Association | 2013

PERSONAL DETAILS

DOB: 6th July 1991

Languages Known: English, Hindi

Location: Hyderabad, Telangana

Talent Unlimited Services Online Pvt. Ltd. (Bobble AI) – Gurugram, Haryana **Mobile Engineering Lead | Oct 2022 – Dec 2023**

- Spearheaded the development and delivery of multiple Android applications in a consumer-facing AI product environment.
- Managed a team of **7 Android developers**, fostering a collaborative culture that supported performance and retention.
- Conducted regular performance reviews and implemented development plans, contributing to a **34% increase in team productivity**.
- Coordinated with product, QA, and design teams to ensure timely and high-quality releases.

Key Achievements:

- **Improved team retention and engagement scores by 50%** via structured mentoring and feedback cycles.
- **Improved sprint predictability by 30-35%** via tighter estimation and cross-team coordination.

Roppen Transportation Services Pvt. Ltd. (Rapido) – Bengaluru, Karnataka **Senior Product Engineer | Sep 2021 – Oct 2022**

- Architected and designed Android product features focused on **payments, customer support, and overall user experience**.
- Contributed to improved customer feedback and smoother payment workflows within the app.
- Managed sprint deliveries, ensuring timely completion of high-priority features.
- Led collaboration with cross-functional teams to streamline product development processes.

Hora Education Services Pvt. Ltd. – Gurugram, Haryana **Technology Lead | Nov 2018 – Apr 2021**

- Contributed to product roadmap discussions and hands-on mobile application development.
- Managed multiple teams handling project deliveries, task assignments, and execution planning.
- Developed an in-house cross-platform application using **Flutter** for **Android, iOS, and Web** for **Sitare Foundation**.
- Built a **fintech lending application (Florence Capital)** for Hora, supporting end-to-end mobile development.

Times Internet Ltd. – Gurugram & Noida | Sr. Software Engineer | Jun 2016 – Nov 2018

- Developed a live trivia application (**Brain Baazi / Baazi Now**) from scratch.
- Led a team of **3 Android developers** during early scaling phases of the product.
- Scaled the application to **10M+ downloads** in India, ranking among the **top 3 apps** in its category.
- Worked on an **AR-enabled camera-based e-commerce application (Alive)**, significantly improving SDK responsiveness.
- Implemented multiple analytics tools to monitor traffic and events, enabling better product decision-making.

Key Achievements

- **Received the Aspire Award twice at Times Internet Ltd.** in recognition of strong performance and timely project delivery.

Jarvis Technologies – Gurugram, Haryana | Sr. Software Engineer | Mar 2016 – May 2016

- Worked as a senior Android developer on an **IoT-based location tracking product (ApTag)**.

Hytech Professionals – Noida, Uttar Pradesh | Sr. Software Engineer | Sep 2015 – Feb 2016

- Worked with the product team to translate design requirements into Android UI and functionality.
- Revamped a matrimonial matchmaking application end-to-end, completing the full app development in **3 months**.

ACSG Corp. – New Delhi, India | Senior Software Engineer | Jan 2014 – Sep 2015

- Worked on Android applications involving **camera, video, and audio** features.
- Implemented mobile security practices aligned with **OWASP** guidelines.
- Integrated **C++ components using JNI and Android NDK**.
